

Your blood donation is invaluable to us and to the community we serve.

In fact...

	Someone needs blood every 2 seconds in the U.S.
	A single car accident victim can require as many as 100 pints of blood to survive.
	Cancer patients often need regular blood transfusions to keep fighting their disease.
	On average, 1 in every 7 people entering a hospital will need blood.
	Blood can't be manufactured. It can only come from volunteer donors .
	62% of the population can donate blood but only 3% actually do.

Be part of the amazing 3%! Make an appointment at [versiti.org/wheretodotate](https://www.versiti.org/wheretodotate).
